## Propiedad Extends

Elegí en mi página Home dos títulos con las mismas características lo único que cambio fue el tamaño y el margen.

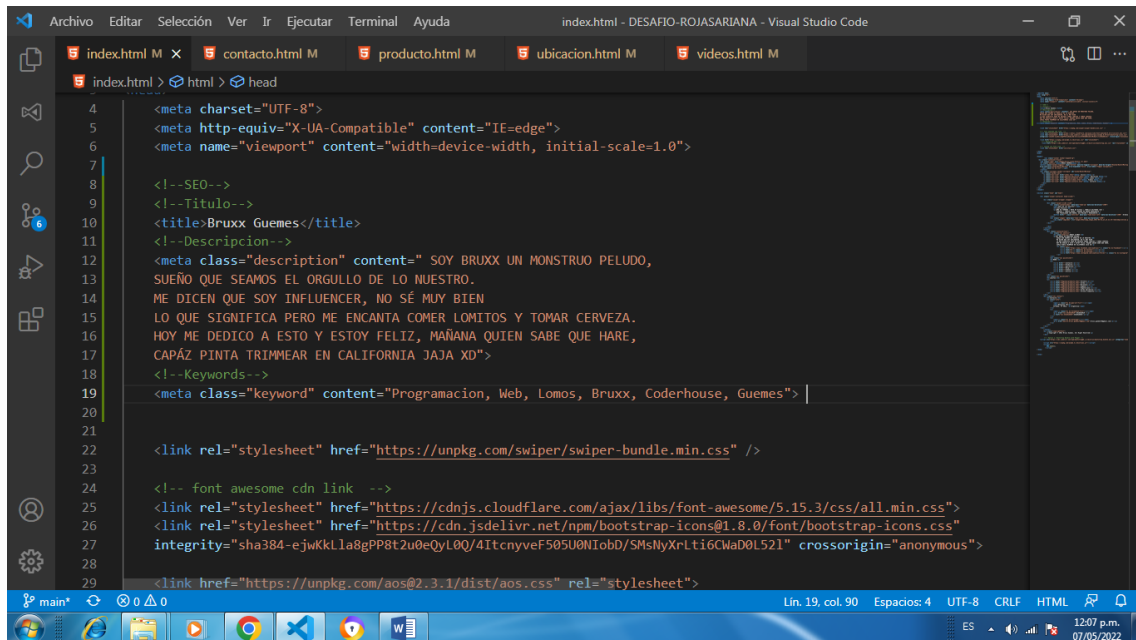

The screenshot shows the Visual Studio Code interface with the Explorer sidebar on the left displaying a project named 'DESAFIO-ROJASARIANA'. The file explorer shows a 'componentes' folder containing several SCSS files: '\_footer.scss', '\_formulario.scss', '\_galeria.scss', '\_home.scss' (selected), '\_ubicacion.scss', and '\_video.scss'. The main editor area shows the content of '\_home.scss'. It includes a CSS rule for '.h2bruxx' with a width of 100% and a background position of 400%. Below this, there is a comment '----EXTENDS INDEX H2 Y H3 LETRAS COLORES---' and another rule for '.h2bruxx' that extends the '.h3index' rule, setting font-size to 20px and margin-left to 0rem.

```
93 }
94 100%
95 {
96     background-position: 400%;
97 }
98 }
99
100 //----EXTENDS INDEX H2 Y H3 LETRAS COLORES---
101 .h2bruxx
102 {
103     @extend .h3index;
104     font-size: 20px;
105     margin-left: 0rem;
106 }
